Department of Geography

Faculty of Natural Sciences

JAMIA MILLIA ISLAMIA NEW DELHI – 110 025

(A Central University by an Act of Parliament)

B.A. /B.Sc. (H) Geography

Syllabus (w.e.f. 2012-2013)

Course Structure B.A. /B.Sc. (H) Geography

Semester-I

Paper	Title	Credits
GEB-101	Geomorphology	4
GEB-102	Climatology	4
GEB-103	Oceanography	4
GEB-104	Introduction to Cartography (Practical)	2
	Semester-II	
GEB-201	Principles of Ecology	4
GEB-202	Geography of Soil	4
GEB-203	Hydrology and Water Resource	4
GEB-204	Representation of Physical Data (Practical)	2

Semester-III

Paper	Title	Credits
GEB-301	Man and Environment	4
GEB-302	World Regional Geography	4
GEB-303	Regional Geography of India	4
GEB-304	Statistical Techniques in Geography (Practical) 2

Semester-IV

Paper	Title	Credits
GEB-401	Environmental Issues and management	4
GEB-402	Evolution of Geographical Thought	4
GEB-403	Fundamentals of RS/GIS/GPS (Theory)	4
GEB-404R	2	
GEB-405 Land Surveying (Practical)		
	Semester-V	
Paper	Title	Credits
GEB-501	Economic Geography	4
GEB-502	Geography of resources	4
GEB-503	Regional Development	4
GEB-504	Geography of Population	4
GEB-505	Image Interpretation (Practical)	2
GEB-506	Geography Information System (Practical)	2
	Semester-VI	
Paper		Credits
GEB-601	Geography of Rural Development	4
GEB-602	Urban Geography	4
GEB-603	Geography of tourism	4
GEB-604	Social and Cultural Geography	4
GEB-605	Disaster Management	4
GEB-606	Land Resource Management	4

Note: Student has to select any four from 601,602,603,604,605, and 606

Socio-Economic Survey (Practical

Case Study (Project)

GEB-607

GEB-608

2

Paper (GEB-101)

Geomorphology

Credit: 4

Unit-I: Fundamentals/Basics of Geomorphology

The nature and scope of Geomorphology; Constitution of earth's interior; Geological Time Scale; Continental Drift, Plate Tectonics.

Unit-II: Geomorphic Structure and Processes

Forces of earth crust and earth movements; Folds and Faults; Rocks: Formation and Types; Volcanoes and Earthquakes; Weathering: Normal cycle of Erosion by Davis & Penk.

Unit-III: Evolution of Landscape

Fluvial, Glacial, Aeolian, Karst and Coastal.

Unit-IV: Applied Geomorphology

relevance of Geomorphological studies in Environment Management, Settlement and Industries.

- 1. Dayal, P., 1990. Text-Book of Geomorphology, Shukla Book Depot, Patna.

- 8. Strahaler, A.H., 2008:. Modern Physical Geography (4th Edition); Wiley-India
- 9. Thornbury, W.D., 1991. Principles of Geomorphology, Wiley Eastern Ltd., New Delhi
- 10. Worcester, P.C., 1969, Text Book of Geomorphology, East West Press, New Delhi.

Paper (GEB-102)

Climatology

Credit: 4

Unit-I: The Atmosphere

Nature and scope of climatology, Composition and structure of the atmosphere; Insolation and its factor; heat Budget; Horizontal and vertical Distribution of temperature.

Unit-II: Atmospheric Moisture

Atmospheric Evaporation; Humidity; Condensation, Precipitation, types of rainfall, Hydrological Cycle.

Unit-III: Atmospheric Disturbances

Atmospheric pressure and winds, Air Masses and Fronts; Cyclones and anti cyclones, Tropical and Temperate cyclones; Thunderstorms: Type and Distributions.

Unit-IV: Regional and Applied Climatology

Koppen's Classification of Climates, Global Warming; Air Pollution, Climatic Change and its impact on the earth.

- 1. Barry, R.G. and Chorley P.J 1982. Atmosphere Weather and climate, Fletcher & Son Ltd., Norwich.
- 2. Critchfield, J.H.: General Climatology
- 3. Das,P.K.: Monsoon
- 4. Fein, J.S. and Stephens, P.N.: Monsoon

- 10. Thompson, R.D. and Perry: Applied Climatology, Principles and Practice.

Paper (GEB-103)

Oceanography

Credit: 4

Unit-I: Ocean Floor

Nature and Scope of oceanography; Surface configuration of Ocean floor; Sub-marine relief of Atlantic, Pacific and Indian Oceans.

Unit-II: Physical Properties of Ocean

Horizontal and vertical Distribution of Temperature and Salinity; Ocean Deposits and Coral Reef.

Unit-III: Currents and tides

Ocean currents: Ocean currents of Atlantic, Pacific and Indian oceans; Origin of Tides and their types; Equilibrium theory of tides and Tsunamis.

Unit-IV: Applied Oceanography

Types of Marine resources; Marine resources and their usage; Pollution and its management.

- 1. Basu S.K. (2003) (ed): Handbook of Oceanography, Global Vision, delhi.
- 2. Davis Richard A. (1972): Oceanography, Addition Wesley Publishing Co.

- 10. Weisberg J. and Howard P. (1974): Introductory Oceanography. McGraw Hill, Kogakusha, Tokyo.

Practical (GEB -104)

Introduction to Cartography Credit: 2

UNIT-I: MAP INTRODUCTION

Map: Definition, Significance, Classification and Usefulness

UNIT-II: SCALES

Definition of scale; Methods of scale representation on a map; drawing of plane, comparative and diagonal scales; Calculation of radii of small circles on the globe, calculation of R.F. from arcs of meridians and parallels.

UNIT-III: ELEMENTS OF GLOBE

Globe V/s Map: Concept of small and great circle; Parallels of latitude and meridian of Longitude, graticule of parallels and meridians, locating points on the globe.

UNIT-IV: MAP PROJECTIONS

Definition, general Principles and Classification of map projection; Graphical Construction of Cylindrical Projections: Mercator's, and equal area; Conical projections; Polyconic, Bonnes, One standard two standard parallels. Zenithal: Gnomonic, Stereographic and Ortho graphic projections.

- 2. Mahmood .A. (2000) Statistical Methods in Geographical Studies, Rajesh Publications Ansari Road, New Delhi-2.
- 3. Sharma, J.P. 2010, Practical Geography, Rastogi Publication, Meerut.

Paper-(GEB-201)

Principles of Ecology

Credit: 4

Unit-I: Introduction

Definition, Scope, Evolution and development; Difference between Ecology and Human Ecology; Environmentalism; Conservation Ethics.

Unit-II: Human and Environment Interaction

Human Adaptation and Modification: Environmental Adaptation Types, Aquatic, Desert and Soil adaptations; Resources and Technologies.

Unit-III: Bio-Geochemical and Nutrient cycles

Nitrogen Cycle, Carbon Cycle, Phosphorous Cycle, Sulphur Cycle, Aresenic Cycle, Water Cycle, Human Population Size and Growth; carrying Capacity of Earth: Biophysical, Human.

Unit-IV: Ecosystem

Ecosystem: Kinds of Ecosystem, Types, physical, Chemical structure and functions; Genetic Energy flow within the Ecosystem, Y- Shaped Model of Energy Flow, Food-Chain and Tropic Levels and Ecological

Paper-(GEB-202)

Geography of Soil

Credit: 4

Unit-I: Basic Concepts and Processes

Soil: Nature, Scope and significance; Soil Geography and Pedology; Process of Soil formation and its Factors; Soil Profile and development: Soil catena, Pedologic Regimes, Podolization, Laterization, Calcification and gleezation.

Unit-II: Soil Organisms and Soil Properties

Macro and micro organisms® Like earthworms, snow bugs, mites, cetipedes, rodents, insects, nematodes, Protozoa rotifers, algae and fungi, bacreria and actinomyces); Physical and Chemical properties of the soil.

Unit-III: Soil Classification and Evaluation

Genetic and Taxonomic classifications; Seventh approximation; Evaluation of land and Soil® (Parametric and non-parametric; soil surveys and modern techniques: Remote Sensing and GPS).

Unit IV: Soil Reclamation and Management

Soil erosion and conservation; Reclamation of soils; Integrated soil and water management; Sustainable development of soil resources with reference to India.

- 1. Backman, H.O., and N.C.Brady, 1960. The Nature and Properties of Soils, Mc Millan, NY.

- 6. Raychoudhuri, S.P; 1958. Soils of India ICAR, New Delhi.

Paper (GEB - 203)

HYDROLOGY & WATER RESOURCES

Credit: 4

Unit-I: Introduction

Definition and Scope of Hydrology, Hydrological cycle, Structure and properties of water, Earth's water resources and water as a cyclic resource.

Unit-II: Surface water

Surface water: sources and factors affecting quality and quantity: Precipitation: forms and estimation; Runoff: sources, and factors affecting runoff; Evaporation: factors and measurement; Transpiration: significance and factors; Evapotranspiration.

Unit-III: Ground Water

Ground water: Characteristics of stream flow, porosity and permeability, infiltration, Ground water: storage, aquifers, movement and discharge.

Unit-IV: Water Management

Interface between surface and Ground Water; Environmental influences on water resources; urban water supply; water management; water harvesting; water pollution and measures to control.

Practical-(GEB-204)

Representation of Physical Data

Credit: 2

Unit-I: Representation of Relief-I

- a) Methods of depicting relief feature:-contour; Hachures, hill shading and layer tinting.
- b) Drawing of Profiles: Composite, serial and Projected

Unit-II: Representation of Relief-II

- a): Representation of waterfall, spur, saddle, escarpment, valley with their contours.
- b): Determination of slope, Gradient
- c): Interpretation of topographical maps and Geological Maps.

Unit-III: Representation of Climatic Data

- a): Representation of climatic data through Bar graph, linegraphs,
- b): Representation of climatic data through isotherms, isobars, & Isohytes.
- c): drawing of climographs, Hythergraphs and wind roses.

Unit-IV: Study of Weather Charts/Maps

- a): Study of weather symbols given on a weather map of India.
- b): Interpretation of a weather chart of India.
- c): Pertaining to different season.

- 6. Robinson.A.H.1978: Elements of Cartography, John Wiley, New York.

Paper-(GEB-301)

Man and Environment

Credit: 4

Unit-I: Man and Environment

Man-environment relationship and its social relevance; Elements of physical and cultural environment; Approaches: Environmental determinism, possiblism and Modern environmentalism.

Unit-II: Population and Human Settlements

World population growth; population distribution and its determinants; Type and patterns of human settlements: Urban and Rural; Trends and Patterns of World urbanization and Migration.

Unit-III: Human Adaptation to Environment

Man in eco-system; Ecological adaptation; Biom-Climatic regions of the World; Human adaptation in equatorial, monsoon, hot desert and tundra regions.

Unit-IV: Environmental Crisis and Management

Environment as a resource system; Technology and resources; environmental crisis-nature and management of deforestation, flood and droughts, Land degradation/deforestation and their management.

Paper-(GEB-302)

World Regional Geography

Credit: 4

Unit-I: Physical Landscape

Landforms and Drainage, Climate, Vegetation, Soil, World Natural Regions.

Unit-II: Economic Resources

Main Economic Resources, Mineral resources, Iron, Energy; Major Economic Regions-Agriculture and Industrial.

Unit-III: Human Resources

Population Distribution, Density, Migration and Growth; Population Composition: Rural-Urban, Economic; Major Demographic Regions.

Unit-IV: Regional Study

Detailed Study of any one region with emphasis of on Physical, Economic and Population characteristics; Sub regionalization of the continent.

Paper-(GEB-303)

Regional Geography of India

Credit: 4

Unit-I: Physical and Human Landscape

Physiography, Cliomate, Drainage, Vegetation, Soil, Population and Regionalisation schemes.

Unit-II: Upper Ganga Plain/Rajasthan Desert

Physiography, Cliomate, Drainage, Vegetation, Agriculture, Industries, population.

Unit-III: Chotanagpur Plateau/ Deccan Plateau

Physiography, Cliomate, Drainage, Vegetation, Agriculture, Industries, population.

Unit-IV: Regionalization

Regionalization and major regions of India Based on Factors of regionlization.

Practical-(GEB-304)

Statistical techniques in Geography

Credit: 2

Unit-I: Introduction to Statistics:

Population and Sample; Nature of Statistical data: discrete, Continuous, Measures of Data: Quantitative and Qualitative Data.

Unit-II: Frequency Distribution

Histogram, Frequency polygon, Ogive Curve, Normal and Skewed.

Unit-III: Measures of Central Tendency

Mean, Median, Mode; Measures of Dispersion: Mean deviation, Quartile Deviation, Standard Deviation; Coefficient of variation.

Unit-IV: Measures of Association

Spearman's Rank Correlation; Simple Linear Regression.

Paper-(GEB-401)

Environmental Issues and management

Credit: 4

Unit-I: Conceptual Context

Environment: Definition, components and interconnectedness of its components; Environment as life- support system, resource field and throughput sink; Human and Environment Interaction: Imprint of technological development, trade and scientific progress on environment; Environmental disorders: Human Impact on land, climate, natural vegetation and impacts of utilization of non-renewable natural resources.

Unit-II: Environmental Issues

Global problems: Global warming, ozone depletion and acid rain (acid deposition); climate change, desertification, population dynamics and food security and disaster; Local and Regional Problems: Extreme hydrological events, deforestation, pollution of air and water; Depletion of fresh water resources and degradation of soils; waste management.

Unit-III: Management Strategies

Uncertainty in managing environmental problems: Uncertainty in risk assessment (magnitude, when and where); Preservation or conservation; Incremental management or all out managing; Problem scale in management; component or integrated management, and community participation in management

Unit-IV: Environmental Management

Management of air and water resources; Management of soil and forest resources; Management of biodiversity; Management of habitats (human as well as animals); population management; Management of disaster, and adaptation to global change.

Paper-(GEB-403)

Fundamentals of Remote Sensing/GIS/GPS

Credit: 4

Unit –I: Basics of Remote Sensing

Energy sources and radiation principles; Energy interaction in atmosphere and with earth surface features; Remote sensing Platforms and sensors.

Unit-II: Basics of Photogrammetry and Image Interpretation

Basic geometric characteristics of aerial photographs; Classification of Aerial Photographs, Ground coverage of aerial photographs; Elements of image interpretation.

Unit-III: Concepts of Geographic Information Systems

Scope and components of GIS; Data models-raster and vector; Spatial Analysis-Overlay, proximity and Buffer; 3-D GIS, GIS Application in Geo-Studies.

Unit-IV: Global Positioning System

Basic concepts and segments of GPS; Positioning; Sources of Errors in GPS observation; GPS applications.

Practical-(GEB-404)

Representation of Socio-Economic Data

Credit: 2

UNIT I: ELEMENTARY STATISTICAL MATHODS

Measures of Central Tendency: mean, median and mode; Measures of dispersion; quartile deviation and standard deviation.

UNIT II: MEASURES OF RELATIONSHIP

Measure of Association: Karl Pearson's and Rank correlation method, Product-moment correlate co-efficient; Measure of functional relationship: Simple regression.

UNIT III: REPRESENTATION OF POPULATION AND SOCIAL DATA

Population distribution: Rural (dots) Urban (spheres); population growth (line graph); Age and sex pyramid; literacy (Choropleth- Standard deviation method); Distribution of tribal population (polybar diagram).

UNIT IV: REPRESENTATION OF ECONOMIC AND TRANSPORT DATA

Land utilization (proportional divided circles); Distribution of crops (simple bar, compound bar and polybar diagram) and Distribution of major industries (geometric symbols)

Surveying

Credit: 2

Unit-I Basic Concepts and Principles

Surveying: Definition, classification, objectives, principles; Plane and geodetic surveys; Triangulation: Principles, baseline measurement, extension of base.

Unit-II Levelling

Definition, types, instruments; Levelling by Dumpy level (rise and fall method), use of Indian Pattern Clinometers.

Unit-III Plane Table Survey

Radiation, Intersection; Resection: Two point Problem, Three point problem (mechanical method, Trial and error method, graphical method-Bessel's method); Use of telescopic alidade.

Unit- IV GPS Surveying

Introduction to GPS Surveying, Measurement of

Paper-(GEB-501)

Economic Geography

Credit: 4

Unit-I: Introduction

Subject matter and Scope of Economic geography; Classification of Economic activities; Economic Resources: Concept and classification of Economic Resources

Unit-II: Primary Activities

Major Primary activities: Classification and distribution of major crops; Rice, Wheat and Tea; Land use and Agricultural location models: L.D stamp and J.H. Von Thunen.

Unit-III: Secondary Activities

Distribution and Production of Iron ore, coal, petroleum; Factors of Industrial location; Distribution and potential growth of Iron and Steel industry, Cotton Textiles Industry; Weber's theory of industrial location.

Unit-IV: Tertiary Activities

Trade: Determinants and strategies; International trade with references to GATT and WTO; Transport: Concept Of distance, accessibility and connectivity.

Paper-(GEB-502)

Geography of Resources

Credit: 4

Unit-I: Introduction

Definition of Resources: Context of Becoming resource; Nature of resources: Exhaustibility, degradability, renew ability and substitutability; Resources and market, technology and culture; Significance of Resources: Backbone of Economic growth and development; Pressure on resources.

Unit-II: Classification of Resources

Different approaches to the classification of resources; Exhaustible and inexhaustible, capital and stock, renewable and non-renewable, biotic and abiotic; and Types of resources by their uses.

Unit-III: Geographical Patterns of Resource Endowment

Geographical distribution of major food crops, livestock and fishery resources; Distributional patterns of biodiversity, forests, energy, land, freshwater and miniral resources; and world resource regions.

Unit-IV: Conservation and Management of Resources

Philosophy and Approaches to Conservation of Resources; Conservation of Major Resources: Soil, water, forest and minerals; Importance of biodiversity and its conservation; Resource appraisal and policy making; Management methods of resources; Resource Development and Sustainable resource management.

Paper-(GEB-503)

Regional development

Credit: 4

Unit-I: Region and Development

Region, Development and Planning: Definitions concepts and Types; Methods of delineation of regions: flow analysis, gravitational analysis and weighted analysis method.

Unit-II: Regional Development and Regional Planning

Regional devolvement: Concepts and indicators; Regional Planning: Concepts and purpose; Levels of planning: local, regional and national.

Unit-III: Development Theories and Models

Rostow's model; Core-periphery model; Christaller's central place theory and Growth pole theory.

Unit-IV: National and Regional Plans

Planning in India: Five year plans – goals and achievements; Regional imbalances and inequalities in India; Area Development plans: Tribal and Draught areas; Case Study of a Metropolitan City.

Paper-(GEB-504)

Geography of population

Credit: 4

Unit-I: Introduction to Population Geography

Subject matter and scope of Population geography, Demography and population Geography; Sources of Population Data: Census, Vital Statistics and National Sample Survey; Approaches in population Geography.

Unit-II: Population Distribution and Growth

Population Growth and change: Trends of Population Growth in the World; World Pattern of population distribution; factors affecting population distribution; Population Dynamics: Fertility, Mortality and Migration, Theories of Population growth: Malthusian theory, Theory of Demographic Transition;

Unit-III: Population Composition

Age and Sex Composition; Rural and Urban Composition; Economic Composition Literacy and Education; Religion/Caste/Race etc.

Unit-IV: Population Problems and Policies-India

Declining Sex Ratio, Gender issues: Ageing, crime against Women, Human Trafficking, Child Abuse; HIV/AIDS; Population Policy of India.

Photo and Image Interpretation

Credit: 2

Unit-I: Basics of Remote Sensing

Electromagnetic radiation; Stages of remote sensing; Resolutions; Aerial photographs: types, border information and geometry; Difference between maps and aerial photographs; visual image interpretation: elements, instruments.

Unit-II: Photogrammetry

Numerical problems on aerial Photogrammetry; Types and determination of photoscale; Determination of height of objects using single vertical aerial photograph; Zeiss test; Construction of instrument base, photo base and stereomodel.

Unit-III: Interpretation of Aerial Photographs

Detection of defined objects; Preparation of image interpretations keys; Interpretation of stereograms: fluvial and industrial; Interpretation of stereopairs.

Unit-IV: Interpretation of Satellite Imageries

Satellite Imageries: referencing, types, border information; Feature identification from multi-band imageries; Interpretation of Fcc for land cover/ landuse mapping: salt affected areas, ravenous lands, Chandigarh and Delhi.

Paper-(GEB-601)

Geography of Rural Development

Credit: 4

Unit-I: Concept and Approaches

Rural Development: elements, objectives, scope and significance, approaches to rural development: community development approach, sectoral like approach, target approach, integrated approach, and participatory development approach.

Unit-II: Rural Economics and Rural Development

Rural Economics: concept and scope; Determinants of rural development; Stages in rural economic development Rural Industrialization: Village and small scale industries.

Unit-III: Rural Facilities & Services in India.

Types of community facilities and services: water, sanitation, electricity; Rural education and health; Role of governmental, non-governmental organizations.

Unit-IV: Rural Development Planning & Programmes

Regional Planning: District block level and area Planning; Development Programme and role of Pnchayati Raj Institution; Sectoral: land, water and forests.

Paper-(GEB-605)

Disaster Management Credit: 4

Unit-I: Introduction

Disaster: Definition and significance; Difference between Hazard and Disaster; Disasters: Nature, Types and Magnitude; Earthquakes, Cyclones, Tsunamis, Floods, Droughts, Landslides, Wars and Industrial Disasters.

Unit-II: Risk and Preparedness

Concept of Risk and Vulnerability, Reduction of Risk, Techniques of Risk Assessment, People's Participation in Risk Assessment, National And Global cooperation in Risk Assessment; Disaster Preparedness; Concept and Nature; Community Based Planning, Role of Various Agencies and Government Organizations.

Unit-III: Planning and Management

Integral Development Planning for Disaster Management, Pre-Disaster Planning and management; Early Warning and Prediction System; Post-Disaster Management: Rescue, Relief, Rehabilitation; Public Awareness, Stress Management, Role of National and International Agencies in Disaster Management.

Unit-IV: National Perspective

Disaster Prone Areas of India; Seismic Zones, Areas prone to Floods and Droughts, Landslides and Avalanches, Areas prone to Cyclones and Coastal Hazards, Industrial Disaster Areas, National Disaster Policy of India.

Paper-(GEB-606)

Land Resource management

Credit: 4

Unit-I: Conceptual Framework

Production and Environmental Functions of Land: Land as productive, finite and renewable resource; Economics of Land: Competitive and conflicting uses; The context for Land Management: Vulnerability to degradation and pollution; Sustainable Land Management: The need for, and definition of sustainable land management.

Unit-II: Degradation of Land Resources

Problematic Land and Land Degradation: salinity, alkalinity and acidity of soils; Desertification, deforestation, overgrazing, soil erosion and leaching and water-logging; (Chemical use and soil infertility (nutritive and biological); Soil erosion: Water and air erosion; Processes of soil erosion; Universal Equation of Soil Erosion: Gully erosion: Processes of gully erosion; Desertification: Processes of local/ desertification and expansion of deserts; Deforestation and overgrazing.

Unit-III: Management of Problematic Land Resources

Soil treatment using cost effective amelioration technologies; Appropriate cropping practices in problematic soils; Development of subsurface drainage to reclaim waterlogged land; Restoration of ecologically sensitive land cover; Wise land use: Planning, market instrument and legal enactments to reduce malpractices and misuse of land.

Unit-IV: Management of Degradation of Land resources

Prioritisation of land resources on the basis of level of degradation; Agro ecological/ agro climatic zoning; Management of soil and gully erosion, and reclamation of badlands; Mitigation of local/desertification and minimisation of expansion of desert using ecological technology; Reforestation and restoration of pasture/ grazing lands.

Paper-(GEB-607)

Case Study (Project)

Credit: 2

Each student will be allotted a project from the optional papers offered in VI semester.

Practical-(GEB-608)

Socio Economic Survey

Credit: 2

UNIT I:

Study and interpretation of topographical sheets of selected regions on different scales.

UNIT II:

Collect the social and economic data of its village/ town from various sources.

UNIT III

Conduct a socio-economic survey of the households of the selected village.

UNIT IV:

Based on socio-economic data of the households, prepare a critical field-survey report. Photographs and sketches, in addition to maps and diagrams, may supplement the report.

Books Recommended:

- 1. Gregory, S, 1980. Statistical methods and the Geographer, Longman, London.
- Mahmood, A. 1986. Statistical Methods in Geographical Studies, Rajesh Pub., New Delhi
- 3. Ibrahim, R., 1992. Socio-Economic Profile of Mewat, Radha Publishers, New Delhi.
- 4. Robinson, A.H. 1978. Elements of Cartography, John Wiley, New York.
- 5. Raisz, E. 1962. Principles of Cartography, Mc Graw Hill, New York.
- 6. Burt J.E. Barber. G.E. Rigby D.L. (2009). Elementary Statistics for Geographers, Guilford Press, New York.

The students have to visit a village/town to conduct socio-Economic survey. Each student will be required to submit a survey report to be evaluated by external and internal examiner.
