

BRIEF REPORT

Visit under academic exchange Programme between Department of Civil Engineering, JMI and University of Applied Sciences, ERFURT (FH- ERFURT), SEP 2017.

Prelude:

The Department of Civil Engineering, Jamia Millia Islamia has an academic exchange programme with *University of Applied Science, Erfurt*, Germany. It is one of the most successful International Exchange Program between JMI and a foreign university, which is being successfully implemented since 2005 under the MOU between the two universities

The Objective of this exchange programme is to develop programs, seminars, exchanges and visits to promote the educational, social and economic well being of students and faculty, as well as, the people and regions served by two Institutions.

It is among one of the most active MoU's of the University under which **Twelve Batches** of students and teachers from both the sides have visited India/Germany to work on the stability studies of the monuments in collaboration with Archeological Survey of India. The students from Jamia were privileged to get training in the specialized laboratories of University of Applied Sciences, Erfurt. Further, this MoU also provides an opportunity to students of both collaborating countries to explore the social and cultural aspects of each other.

Visit during September 22 to September 29, 2017

This year, a group of 07 students and two professors visited Jamia Millia Islamia.

The list of delegates from FH- ERFURT are:
