HYBRID MODE

Sep 10,11,12 2026

Concept Note

The twenty-first century is marked by rapid technological advancement, global interconnectedness, and complex social, economic, and environmental challenges that are transforming how knowledge is created, shared, and applied. As artificial intelligence, digital technologies, and data-driven systems reshape education, industry, governance, and culture, the urgency to reimagine education systems has never been more pronounced.

Aligned with the vision of India's National Education Policy (NEP) 2020, which emphasizes multidisciplinary learning, Skill development, innovation, digital integration, holistic development, and effective implementation of educational reforms, this international conference seeks to engage academicians, policymakers, researchers, practitioners, and thought leaders in a meaningful dialogue on the future of learning. The conference focuses not only on emerging ideas and innovations but also on the processes, strategies, and challenges involved in implementing transformative educational practices. Through interdisciplinary engagement, it explores how education can foster critical thinking, adaptability, ethical responsibility, and lifelong learning while promoting inclusive, resilient, and sustainable societies.

Abstract Guidelines

- 250-300 words
- 4 to 6 relevant keywords
- Size 13, 1.5 spacing, justified.
