Course Highlights

1. Foundations of environmental sustainability through Indian Knowledge Systems (IKS).
2. Traditional ecological knowledge and community-based resource management.
3. Indigenous water conservation and watershed-management practices.
4. Sustainable agriculture, soil health and traditional farming systems.
5. Biodiversity conservation through sacred groves and cultural traditions.
6. Human health and life sciences through Indian Knowledge Systems: Ayurveda, medicinal plants, traditional nutrition and preventive healthcare.
7. Traditional architecture, climate-responsive design and sustainable materials.
8. Circular economy principles in indigenous production and consumption systems.
9. Integration of modern science, green technology and traditional knowledge.
10. Climate-change adaptation, disaster resilience and nature-based solutions.
11. Innovative policies and practical strategies for achieving the Sustainable Development Goals (SDGs).

Multidisciplinary Participation

Environmental Sciences, Life Sciences, Social Sciences, Humanities, Languages and allied disciplines

Participant Information & Support

Eligibility for Participation

In-service teachers in higher education working in universities and colleges included under Section 2(f) of the UGC Act are eligible, even if their institution is not yet included under Section 12(B). Teachers from colleges outside Section 2(f) may also participate when the college has been affiliated with a university for at least five years. Faculty members working in Institutes of National Importance are also eligible.

Certificate Requirements

Attend all sessions and complete individual/group assignments, tests and other evaluation exercises. Participants are advised to bring a personal laptop.
